DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, and 31-44, drawn to computer processing apparatus and a computer system, classified in class 705, subclass 1.
- II. Claims 15-30, and 45-60, drawn to methods of searching, classified in class 707, subclass 3.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case --the apparatus as claimed is a computer processor or a computer system and can be used to practice another and materially different process such as computer programming for software, computer game playing, downloading Internet messages, word processing, arithmetic calculations etc...the apparatus does not need to be used only for searching a database.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2175

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
